# 发展前景 DEVELOPMENT PROSPECT

企业文化从物质层中的“企业为员工创造的工作环境”，到观念层中的“企业精神和宗旨”，再到精神层中的“预期，价值观”等，都对企业内的员工有着一定的激励作用。优良的工作环境和良好心理预期会使企业员工从内心产生一种情绪高昂、奋发进取的效应。

企业文化的作用正是通过激励来满足人的精神需要，使员工产生归属感、自尊感和成就感，从而调动员工的精神力量。由于它迎合了人的需要，适应了人的本质，因此企业文化的激励作用比其他任何形式都更有效。

The enterprise culture, from the "working environment made for the staff members by the enterprise" in the layer of substances to the "enterprise spirit and motto" in the layer of concept, then to the "expectation, concept of value" etc. in the layer of spirit, offers a kind of encouragement to the staff members and an excellent working environment and a good psychological expectation will make such an effect as high spirits and forging-ahead produced from the heart of them.

What is the action of the enterprise culture is just by means of encouragement to satisfy the need of spirit for people and to make staff members a sense of ascription, a sense of self-respect and a sense of achievement so as to arouse their spiritual strength and, because the enterprise culture caters to the need of people and suits for the nature of people, so its encouraging action comes as being more effective than any other forms.

### 特点 Characters

隔膜阀是一特殊型式的截断阀，它与其它阀门相比具有以下特点：

- 1、弹性密封的开闭件，确保没有内漏；
  - 2、流线型的流道，使得压力损失小；
  - 3、没有填料，因此没有外漏；
  - 4、阀门与盖板中间隔膜隔开，使得隔膜上方的阀盖、阀杆等零件不受介质侵蚀；
  - 5、隔膜可更换，维护费用低；
  - 6、衬里材料的多样性，可适用于各种介质，并具有良好的耐腐蚀性。
- Diaphragm valve comes as a cutoff valve of a special type and, compared with other valves, features the following characters:
1. The closure of the elastic seal makes sure of non-leak from the inside;
  2. The streamlined runner makes a small pressure loss;
  3. There is no outward leak, as there is no packing;
  4. A middle diaphragm is set between both valve and cover so as have the bonnet, stem etc. parts on the upper of the diaphragm without getting eroded by the medium;
  5. The diaphragm is replaceable, leaving a low cost of maintenance;
  6. The variety of the lining materials can be utilized for various media and makes the said materials a good anti-corrosiveness.

### 阀体衬里材料的使用温度和适用介质 Temperature of use and suitable media of the body lining materials

衬里材料(代号) Lining material (code)	使用温度 Temperature of use (°C)	适用介质 Applicable medium
*硬橡胶(NR)	-10°C~+85°C	除强氧化剂(如硝酸、铬酸、浓硫酸及过氧化氢等和有机溶剂)外的氯氢酸、氟硅酸、蚁酸和酚酸、盐酸、30%硫酸、50%氯氟酸、80%磷酸、碱、盐类、镀金属溶液、氯化物、氯氧化钾、中性盐水溶液、10%次氯酸钠、湿氯气、氮气、大部分醇类，有机酸及酯类等。 Exclusive of strong oxidants (such as nitric acid, thick fluoric acid, hydrogen peroxide etc. and organic solvents), hydrochloric acid, fluorosilicic acid, formic acid and phenolic acid, hydrochloric acid, 30% sulfuric acid, 50% hydrofluoric acid, 80% phosphoric acid, alkali, saline, metal-plating solution, sodium hydroxide, potassium hydroxide, neutral brine solution, 10% sodium hypochlorite, wet chlorine, most alcohols, organic acid, aldehyde etc.
软橡胶(BR)	-10°C~+85°C	水泥、粘土、煤渣灰、颗粒状化肥及磨损性较强的固态流体、各种浓度盐酸等。 Cement, clay, cinder ash, granular chemical fertilizer and powerfully worn-out solid fluid, the cylinder mucus of various concentrations.
乙丙胶(EPDM)	≤120°C	具有天然胶相似的耐酸、碱性能，用于低压蒸汽、热水、冷水性能极为良好。Of the acid-alkali resistance similar to that of the natural rubber, used for low pressure steam, hot water, cold water, very excellent performance.
丁基胶(HR)	-10°C~+120°C	有机酸、碱和氢氧化物、无机盐及无机酸、元素气体醇类、醛类、酮类、酯类等。 Organic acid, alkali and oxyhydroxide, inorganic salt and inorganic acid, aldehyde, ether, ketone, ester etc.
聚四氟乙稀PTFE(F4)	≤180°C	强酸、强碱、强氧化剂、有机溶剂等。 Strong acid, strong alkali, strong oxidant, organic solvent, etc.
聚全氟丙烯塑料FEP(F46)	≤150°C	任何有机溶剂或试剂、稀或浓无机酸、碱、醇、酮、芳烃、氯化烃等。 Any organic solvent or reagent, dilute or concentrated inorganic acid, alkali, alcohol, ketone, aromatic hydrocarbon, chlorinated hydrocarbon, etc.
可熔性聚四氟乙稀塑料PFA	≤180°C	强酸、强碱、强氧化剂、有机溶剂等。 Strong acid, strong alkali, strong oxidant, organic solvent, etc.
聚丙烯PP	≤100°C	无机盐类的水溶液、无机酸类、碱类的稀或浓溶液。 An aqueous solution of inorganic salts, inorganic acids, or alkaline or concentrated solutions.
聚烯烃PO	≤110°C	无机盐类的水溶液、无机酸类、碱类的稀或浓溶液。 An aqueous solution of inorganic salts, inorganic acids, or alkaline or concentrated solutions.
聚氯乙烯 (硬质) PVC	≤60°C	耐水、浓碱、非氧化性酸、链烃、油和臭氧等。 Water resistant, concentrated alkali, non-oxidizing acid, chain hydrocarbon, oil and ozone.

衬里材料  
Lining materials

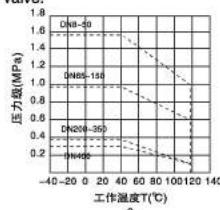

阀体衬里材料的使用温度和适用介质 Temperature of use and suitable media of the body lining materials

聚偏氟乙烯塑料PVDF(F2)	$\leq 100^{\circ}\text{C}$	耐大多数化学药品和溶剂。 Resistant to most chemicals and solvents
聚三氟乙烯塑料PCTFE(F3)	$\leq 120^{\circ}\text{C}$	各种有机溶剂、无机腐蚀液（氧化性酸类）。 Various organic solvents, inorganic corrosion fluids (oxidizing acids).
超高分子量聚乙烯 UHMW-PE	$\leq 100^{\circ}\text{C}$	能耐各种腐蚀性介质（酸、碱、盐，但氯化性酸除外）及有机溶剂。 Able to withstand various corrosive media (acid, alkali, salt, but not oxidized acid) and organic solvents.
玻璃钢（酚醛）FRP	$\leq 120^{\circ}\text{C}$	有机溶剂、耐热油、酸和盐水。 Organic solvents, heat resistant oils, acids and brine.
搪瓷 Enamel	$\leq 100^{\circ}\text{C}$ 初温差急变 Be careful to avoid the quick change of temperature difference	除氢氟酸、浓磷酸及强碱外的其它低度耐腐蚀介质 The other low-degree anti-corrosive media exclusive of hydrofluoric acid, thick phosphoric acid and strong alkali
铸铁无衬里 Cast iron without lining	使用温度按隔膜材料定 The temperature of use shall be set according to the diaphragm material	非腐蚀性介质 Non-corrosive medium
不锈钢无衬里 Stainless steel without lining		一般腐蚀性介质 Generally corrosive medium

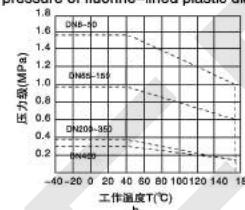

\*为本公司基型产品 As the basic type product of this Company

压力——温度等级 Pressure temperature level

衬胶隔膜阀的压力——温度等级见图a:  
See Fig. a for the pressure-temperature level of rubber-lined diaphragm valve:

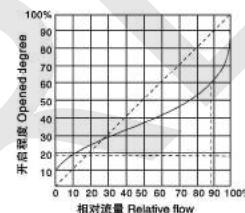

衬氟塑料隔膜阀的压力——温度等级见图b:  
See Fig. b for the pressure-temperature level of pressure-fluorine-lined plastic diaphragm valve

流量特性 Characteristic of flow

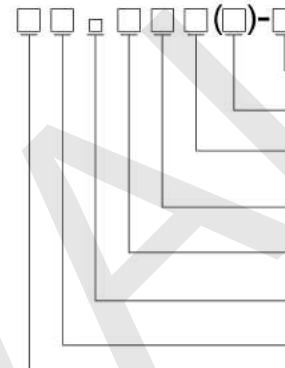

堰式隔膜阀的流量特性如下图所示，即在60%开度之前近似于线性特性。

The characteristic of flow of the weir-type diaphragm valve is shown as the figure below, that means it is closer to a linear characteristic prior to 60% openness.

隔膜阀  
Diaphragm valve

型号表示方法 Model expressing method

- 公称压力数值，以十倍MPa值表示；  
PN value, expressed with ten times of MPa value
- MS表示不带手轮，带手轮无此单元；  
MS means without handwheel, no this unit in case of with handwheel
- 阀座密封面或衬里材料代号，W-无衬里；J-衬橡胶；Fs-衬氟塑料；  
Code of seat ring sealing face or lining material, W-without lining; J-rubber lined; Fs-fluorine-lined plastic;
- 结构形式代号，1-堰式；  
Code of structural form, 1-weir type;
- 连接形式代号，4-法兰连接；  
Code of linkup form, 4-flange linkup;
- K-常开式；B-常闭式；  
K-N.O. type; B-N.C. type;
- 传动方式；6-气动；9-电动；手动无此单元；  
Mode of actuation: 6-pneumatic; 9-electric; no this unit in case of manual;
- EG表示按英国标准设计的隔膜阀  
EG means the diaphragm valve designed according to the standard of UK

安装与维护 Installation and maintenance

- ◆ 安装前应仔细核对管路的运行条件是否与本阀门规定的适用范围相符，并应清洗内腔，以防污染物卡阻或损伤密封部件。
- ◆ 橡胶衬里层和橡胶隔膜表面切勿涂刷油脂类物品，以防橡胶溶胀，影响阀门使用寿命。
- ◆ 安装时不得将线索系留在手轮与阀门上起吊阀门。
- ◆ 手动操作阀门时，不得借助于辅助杠杆，以防扭力过大而损伤驱动部件或密封部件。
- ◆ 阀门应存放在干燥通风的室内，严禁堆放，库存阀门的两端通道必须封口，且启闭件应处于微开启状态。
- ◆ Prior to installation, carefully check if the pipeline running condition conforms to the applicable range set with this valve and clean the internal cavity so as to prevent block-up from pollutant or the sealing part against damage.
- ◆ Do not coat both rubber lining layer and rubber diaphragm surface with oil so as to prevent the rubber against swelling, affecting the valve life.
- ◆ It is not allowed in installation to tie a rope on both handwheel and stem for lifting the valve.
- ◆ Do not use an assistant lever when to manually operate the valve so as to prevent the actuating or sealing part against damage due to an overexerting torsion.
- ◆ Place the valve in a dry and ventilating room and do not let it stacked. The passageway on both side of the valve storehouse shall be sealed and the closures shall be slightly opened.

故障与消除 Failure and settlement

可能产生的故障 Possible failures	原因 Why	消除方法 Elimination method
手轮操作不灵活 Inflexible handwheel operation	1、阀杆弯曲 Stem gets bent 2、螺纹损伤 Thread damaged	1、更换阀杆 Replace stem 2、修正螺纹，并加润滑油 Repair thread and lubricate it
气动时阀门不能自动启闭 Valve can not be open-close automatically at pneumatic	1、气源压力过低 Air source pressure too low 2、弹簧顶紧力过大 Spring jacking force too heavy 3、橡胶隔膜损坏 Rubber diaphragm damaged	1、调高供气压力 Increase air supply pressure 2、减少弹簧顶紧力 Reduce the jacking force 3、更换隔膜 Replace diaphragm
阀体与阀盖连接处渗漏 Leaking from the connection between both body and bonnet	1、连接螺栓松动 Linkup bolt loosened 2、阀体衬胶层破裂 Body rubber-lined layer broken	1、紧固连接螺栓 Tighten it 2、更换阀体 Replace body

	200	570	295	340	8-22	1275	400	4.619 × 10 <sup>2</sup>	0.5	386

注: 1、气动隔膜阀尚可附装反馈信号、限位器或定位器、以适应自控、程控或调节流量的需要。

2、气动阀门的反馈信号采用无触点传感技术。

3、采用薄膜式气缸替代活塞式气缸，排除了活塞环易损漏而导致无法启闭阀门弊端。

4、当气源发生故障时，可操作手轮使阀门开启。

Note:

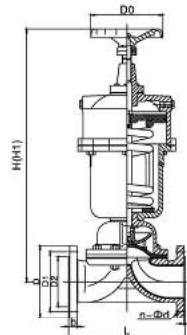

1. The pneumatic diaphragm valve can be still set with feedback signal, limiter or locator so as to suit for the need of automatic control, programmable control or flow adjustment.

2. The feedback signal of the pneumatic valve uses contact-free sensing technique.

3. Instead of a piston cylinder, a membrane one is used to settle the disadvantage that the valve is unable to open and close due to the easily damageable piston ring.

4. In case of a failure with the air source, the valve can be opened and closed by operating the handwheel.

G46W、G46J、EG46J 新型直通式隔膜阀  
Through-way diaphragm valve

专利号: 2014 2 0034137.4

**脱硫专用阀门新改进技术要点:**

- 精确控制: 增加指示机构, 使操作者通过指示杆达到精确启闭。
- 寿命: 通过特殊型倒钟阀芯与特殊型两端阀腔配合, 极大增加使用寿命, 保障压力持续平衡。
- 密封性: 通过特殊型倒钟阀芯配合密封凸缘构成一个紧密的密封结构。
- 防腐: 通过对阀体内部全覆盖的模压防腐蚀层, 提升内部防腐能力。
- 介质: 抗腐蚀、耐磨损、能耐绝大多数的有机酸、碱和氢氧化物、无机盐及有机酸、元素气体、醇类、醛类、酮类、酯类等。

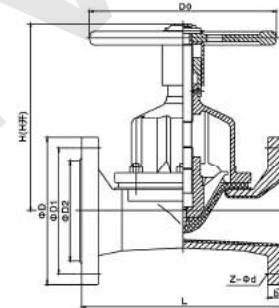

**Technical points for new improvement of desulfurized special valves:**

- Precise control: increase the indication mechanism, so that the operator can achieve the precise opening and closing through the indicator bar.
- Life span: through special type inverted bell valve core and special type of valve cavity, greatly increase the service life and ensure the pressure balance.
- Seal: a tight seal structure with special type inverted bell valve core with seal flange.
- Anti-corrosion: improve internal anti-corrosion ability by moulding anti-corrosion layer inside the body of the valve body.
- Medium: organic acid, alkali and hydroxide, inorganic salts and organic acids, inorganic salts and organic acids, elemental gases, alcohols, aldehydes, ether, ketones, esters, etc.

**技术要求 Technical requirements**

- 设计与制造按 GB12237-89 的规定。
- 法兰连接尺寸按 JB/T8 的规定。
- 试验与检验按 GB/T13927 的规定。
- 装配: (1) 将各零件的配合部位清理干净, 不可有砂粒等杂质。  
(2) 装入零件〈1〉、〈2〉、〈3〉、〈4〉后, 用 M10 内六角螺钉紧固时需根据配合状况进行调整, 但不得损伤密封部件(四氟密封圈、球体)。装配结束后, 应保证密封, 且球体转动轻松。
- 测压: 将压力平稳升至 1.0MPa, 120 秒钟后应无渗漏及其他异常现象, 其它性能测试见下表。
- 试压完成后, 阀门不应有村里脱落、破损等现象。

**概述 Overview**

ZH<sub>B</sub><sup>A</sup>F型精小气动单座衬氟调节阀由气动多弹簧薄膜机构和底流阻、直通单座调节机构组成。在与液体接触的内壁、阀芯均包覆一层聚全氟乙丙烯(F46)、可溶性聚四氟乙烯(PFA)等防腐蚀材料完全能达到切断腐蚀性介质与阀体外壳的接触。该阀门能耐酸、碱、盐等腐蚀性介质和泄漏量要求严格的工况环境，是理想的化工管道系统中过程自动控制产品。

Model ZHF precise pneumatic single-seat fluorine-lined adjusting valve is comprised of a pneumatic multi-spring membrane mechanism and a bottom flow resisting, through-way single-seat adjusting mechanism. Both internal wall and valve core contacting with the fluid are wrapped with a layer of FEP (F46), soluble PTFE (PFA) etc. anti-corrosive materials which can completely cut off the contacting between the corrosive medium and the body shell. This valve can resist acid, alkali, salt etc. corrosive media and suitable for the working condition requiring a strict leakage and an ideal process automatic control product in the chemical pipeline system.

Valve body: cast iron, ductile cast iron

Lining: rubber

Bonnet: cast iron, ductile cast iron

Disk: carbon steel wrapped with rubber completely

**用途 User**

本阀专门用于控制一般腐蚀性介质，阀体内腔表面覆有可供选择的各种橡胶，具有强度高、耐腐蚀性能好的特点；适用于不同工作温度和流体管路，防止各类管路或设备上的介质逆流的单向启闭。

适用温度: ≤85°C、≤100°C、≤120°C (按照衬里材料)

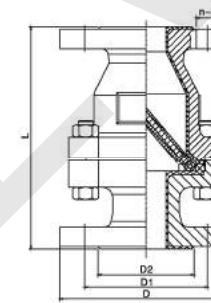

This valve is used specially to control generally corrosive media and the surface of the body internal cavity is covered with multiple selectable rubbers, featuring a high strength, a good performance of corrosion resisting; suitable for different working temperatures and fluid pipelines; of one-way open-close which can prevent the medium from back flowing on various pipelines or equipments.

Applicable temperature: ≤85°C、≤100°C、≤120°C ( according to the lining materials )

FEP(F46)、PCTFE(F3)衬氟蝶阀适用在-50℃~150℃的各种浓度的王水、硫酸、盐酸、氢氟酸和各种有机酸、强酸、强氧化剂，FEP还适用于各种浓度的强碱、有机溶剂以及其他腐蚀性气体、液体介质的管路上使用。

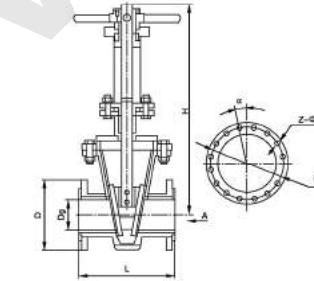

FEP(F46)、PCTFE(F3) fluorine-lined butterfly valves are applicable for -50℃~150℃ nitrohydrochloric acid, sulfuric acid, hydrochloric acid, hydrofluoric acid of various concentrations and various organic acid, strong acid and strong oxidant. FEP is also applicable for the pipeline of strong alkali and organic solvent of various concentrations as well as other corrosive air and liquid media.

GJ841X管夹阀  
Tube pinch valve

A、阀体 body  
B、橡胶管套 rubber tube sleeve  
C、控制流体（水或气）入口 control fluid (water or air) entrance  
E、连接法兰 linkup flange  
手动/自动控制：外加三通手动阀或三通电磁阀控制压缩空气或压力水进入阀体  
Manual/automatic control: additional three-way manual valve or three-way solenoid valve is used to control compressed air or pressurized water to enter the body.

**特点 Characteristics**

- 无压头损失、无堵塞、无泄露、防水撞冲击。
- 特别适用于含颗粒的液——固及气——固二相流。
- 橡胶管套带有纤维增强结构，耐磨、抗疲劳。
- Without pressure loss, without block-up, without leaking, preventing water impact.
- Specially applicable for the grain contained liquid-solid and air-solid two-phase flows.
- The rubber tube sleeve is set with a fiber reinforced structure, wearable and anti-fatigue.

适用介质：水、泥浆、矿浆、腐蚀性等

阀体材质：铝合金（其他材质也可订做）

内衬材料：天然橡胶、三元乙丙胶、硅胶等也可定做

Suitable media: water, slurry, mineral dredg, corrosiveness etc.

Body material: aluminum alloy (other materials can also be made to order)

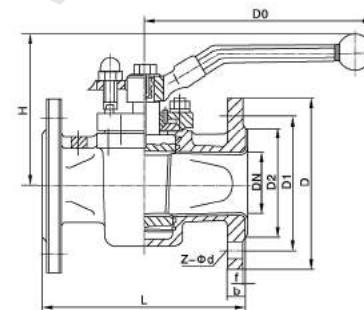

Lining material: natural rubber, EPDM, silicate rubber etc. can be also made to order

口径CAL	DN25~200	DN250~300
工作压力 Pressure of work	max4bar	max3bar
控制压力 Control the pressure	max6bar	max4.5bar
最大压差Maximum differential pressure	3bar	max3bar

Our Mission

FREE-Valve focus on High Quality, Continuous Improvement, Outstanding Service and Trust both in the company and in the relationships with customers. The people of FREE- valve always carry the spirit of craftsmen all the time , so we are known as an excellent source for high quality valve supplies and service.
